

Nitin Classes

Python Course

BASICS

- Class 1. Strings
- Class 2. If, Else & Elif statements
- Class 3. Lists
- Class 4. Operators & methods in lists
- Class 5. While & for loop
- Class 6. Range function
- Class 7. Reusing code
- Class 8. Functions

INTERMEDIATE

- Class 9. Modules in python
- Class 10. Exception handling
- Class 11. Assertions
- Class 12. File handling
- Class 13. Dictionary & tuples
- Class 14. List slices
- Class 15. List comprehension
- Class 16. Functional programming
- Class 17. Anonymous functions

ADVANCED

- Class 18. Map
- Class 19. Filters & Generators
- Class 20. Sets
- Class 21. OOPs
- Class 22. `__init__` method
- Class 23. Magic methods & `super()`
- Class 24. Making classes like containers
- Class 25. Object lifecycle & Data hiding
- Class 26. Class methods
- Class 27. Static methods
- Class 28. Properties
- Class 29. Regular Expressions
- Class 30. Meta characters, Groups
- Class 31. Another Meta character
- Class 32. Special sequences
- Class 33. Email extraction(implementation)
- Class 34. Functional arguments in list & dictionary
- Class 35. Ternary operators
- Class 36. Packaging
